

Market Active Solar

Learning from other initiatives

CSIP-AUS conference Canberra October 2025

Lisa Ibro

Empowering South Australia

Why are we all here today?

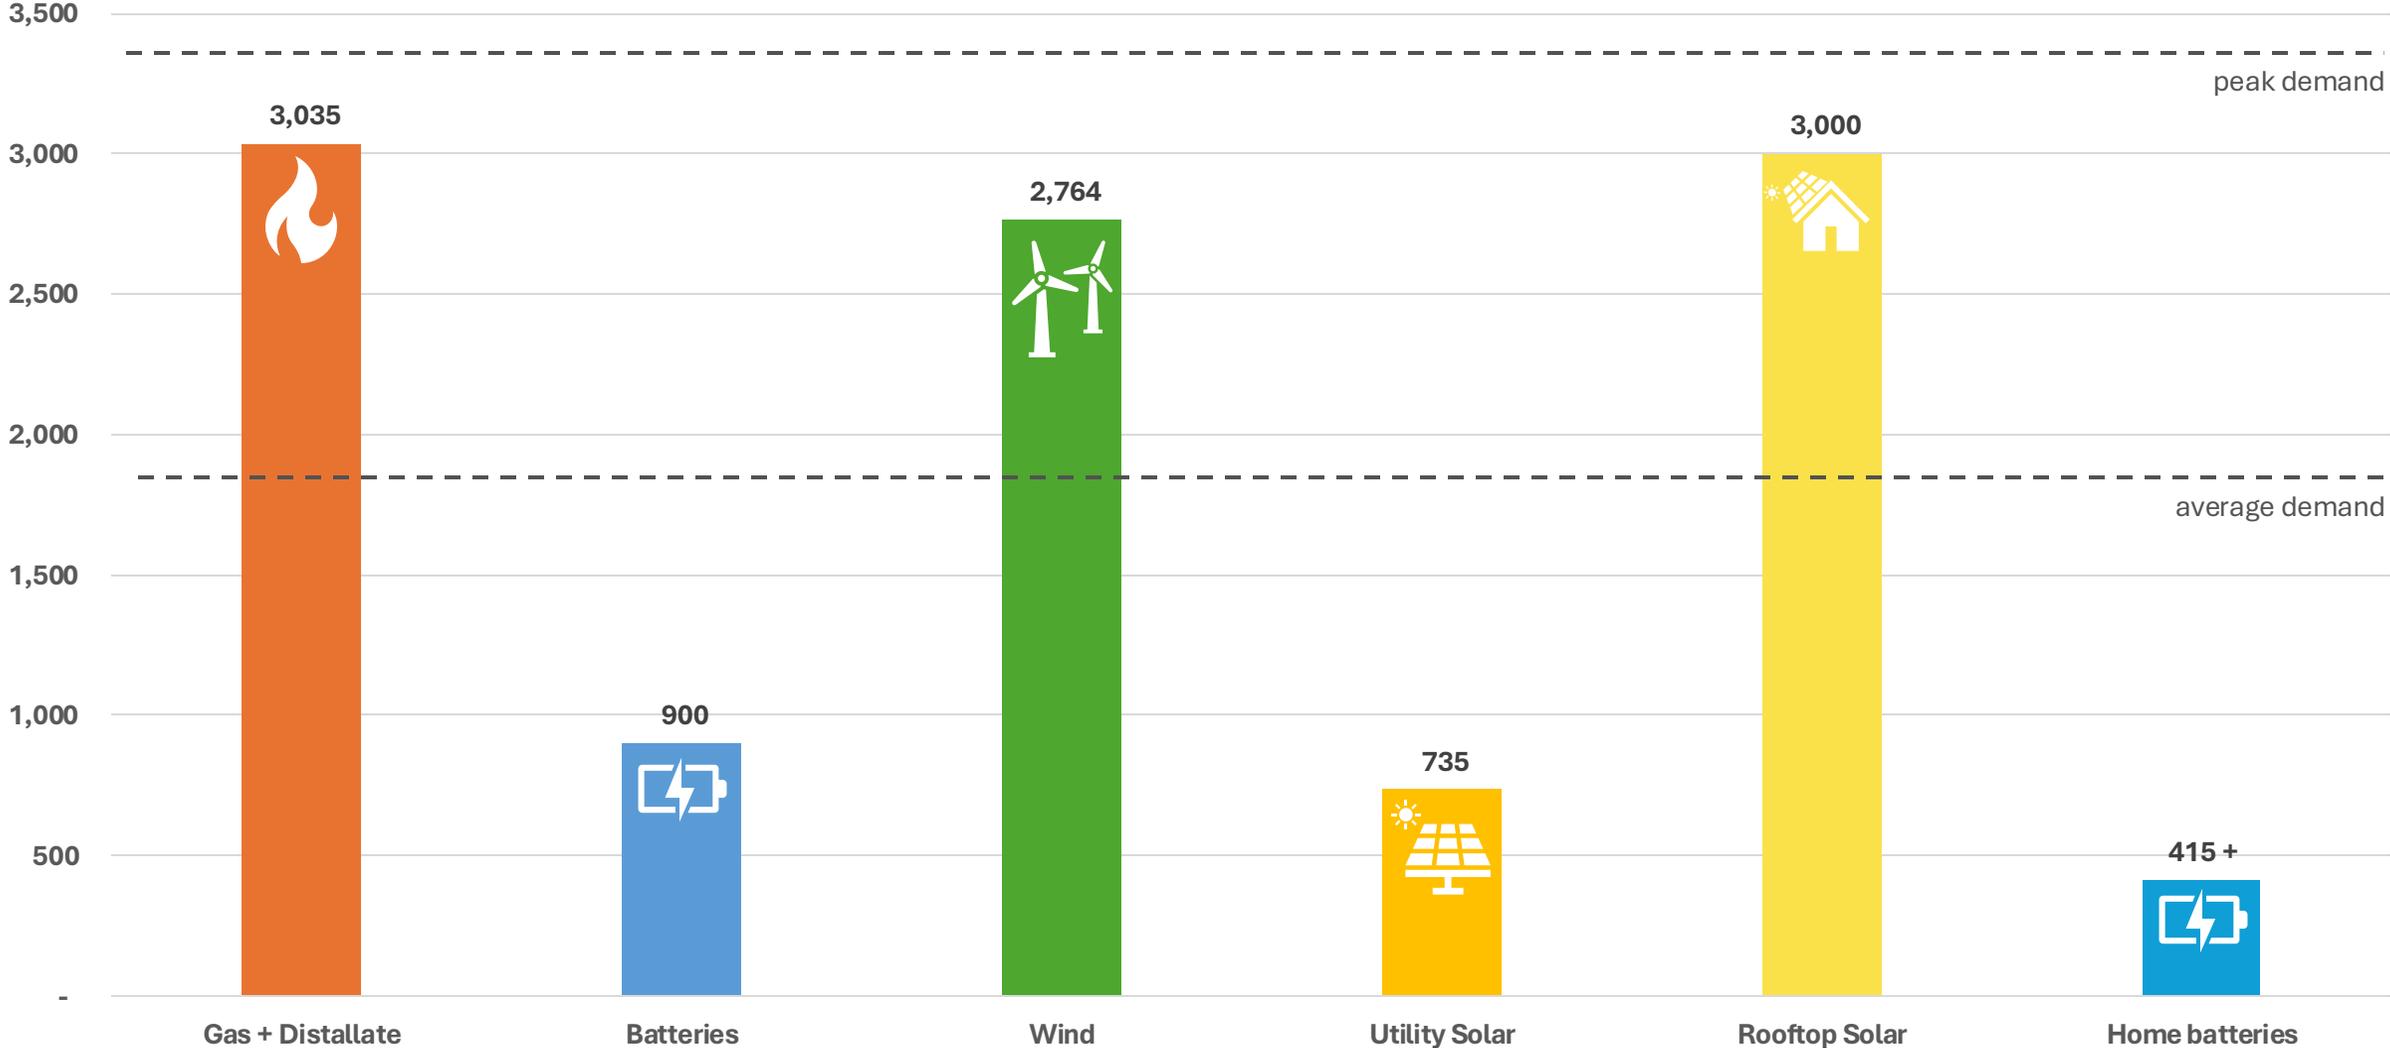

Why are we all here today?

Customers

- Want a seamless approach
- Want the system to be efficient and cost effective
- Want industry to work together

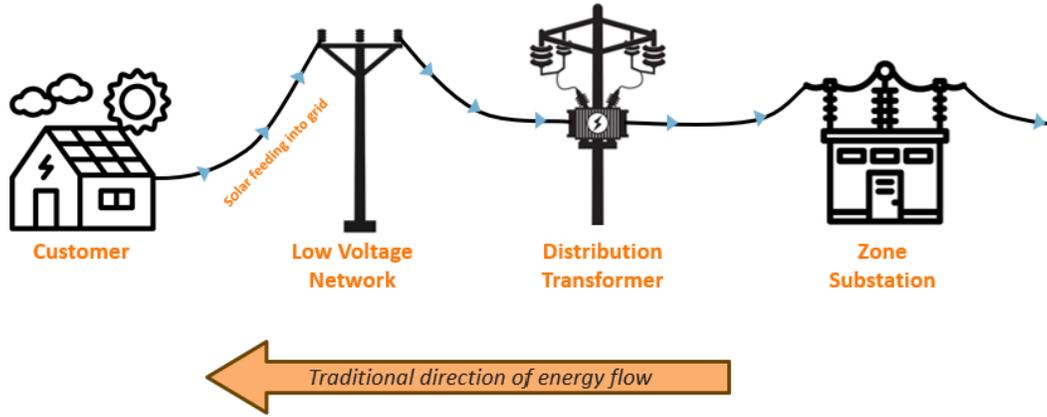

Generation in South Australia (MW)

(OpenElectricity & DER database as of Sept 2025)

What are the challenges with solar integration?

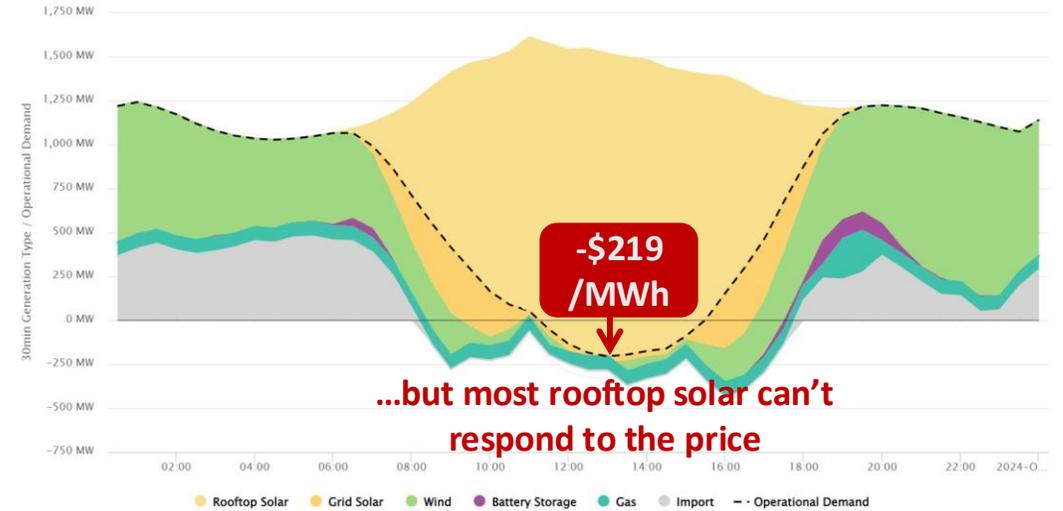

Problem 1: Local network congestion

Solution: flexible exports

Problem 2: Oversupply of solar in the Energy Market

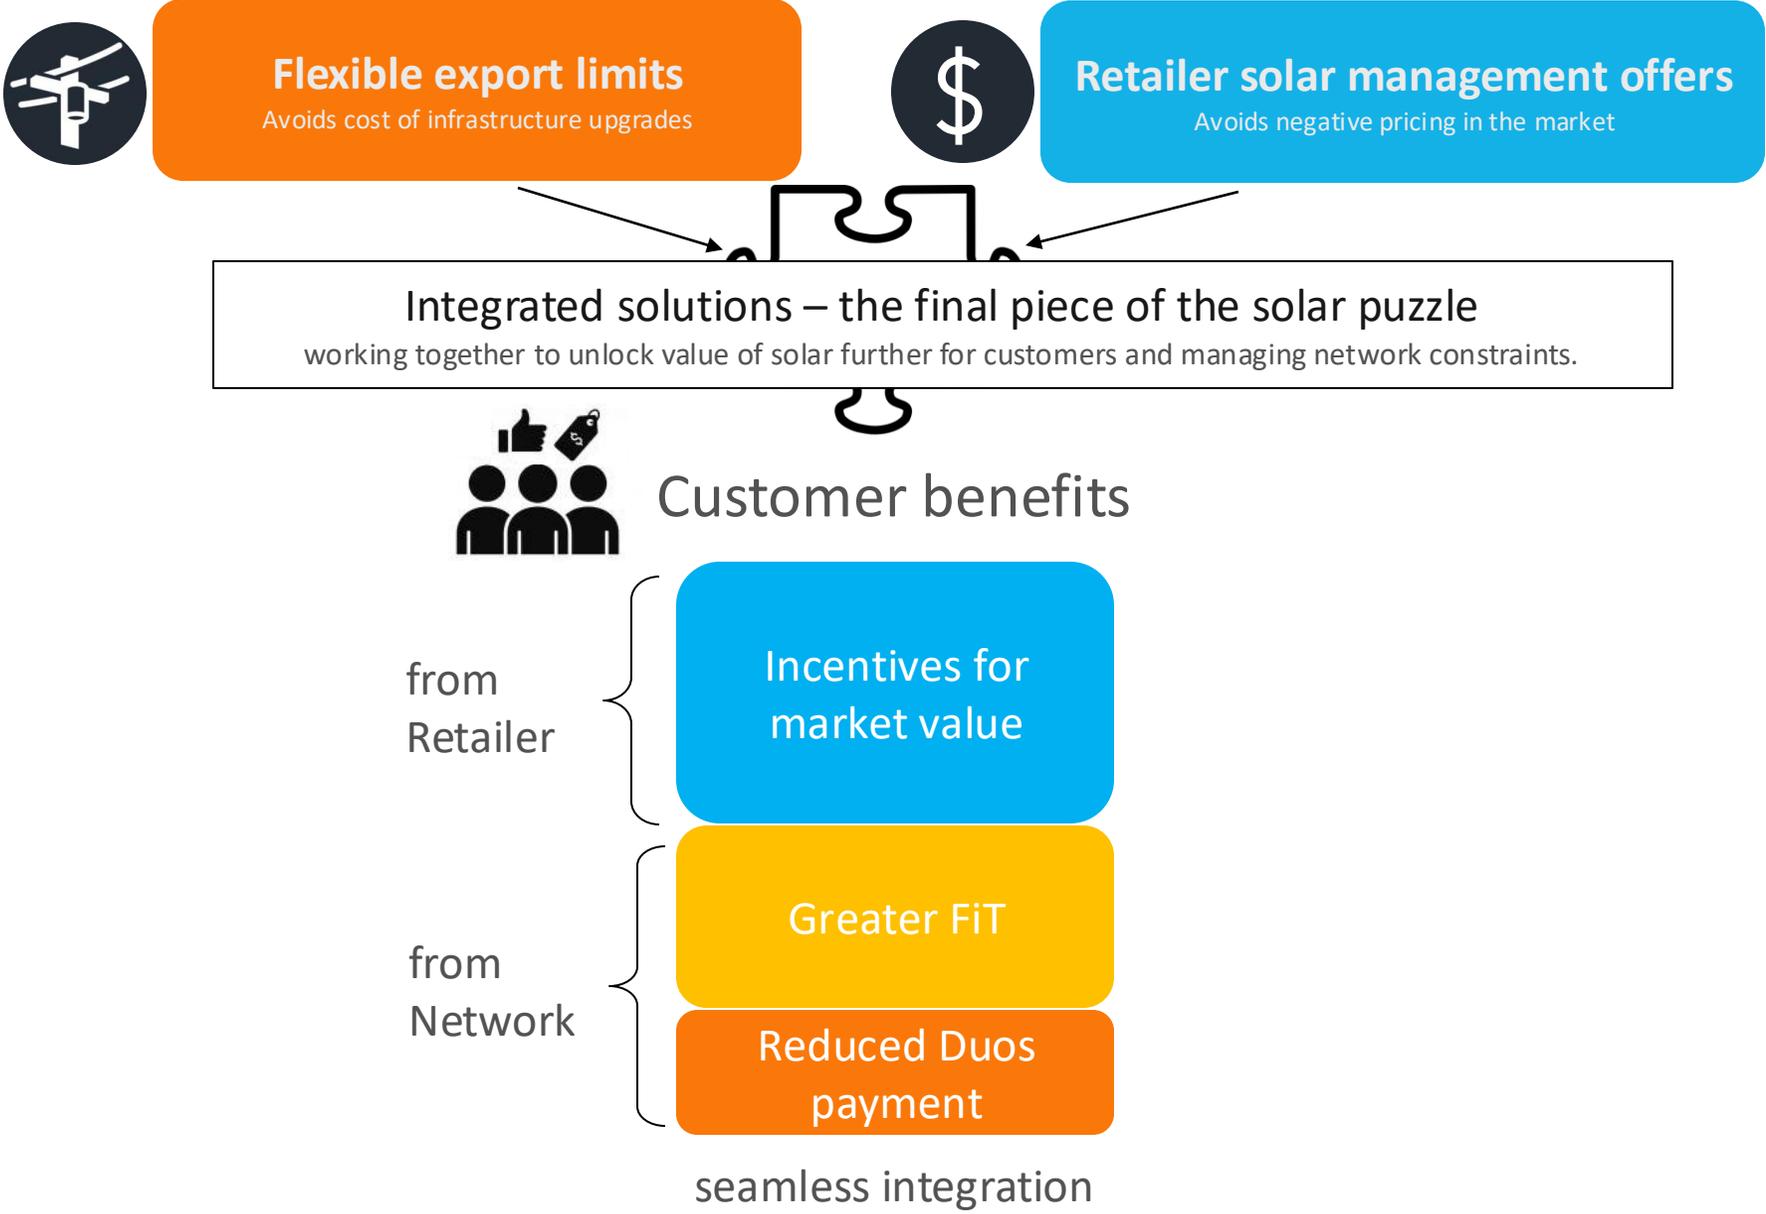

Solution?

Retailer solar management offers

Avoids negative pricing in the market

Integrated solutions

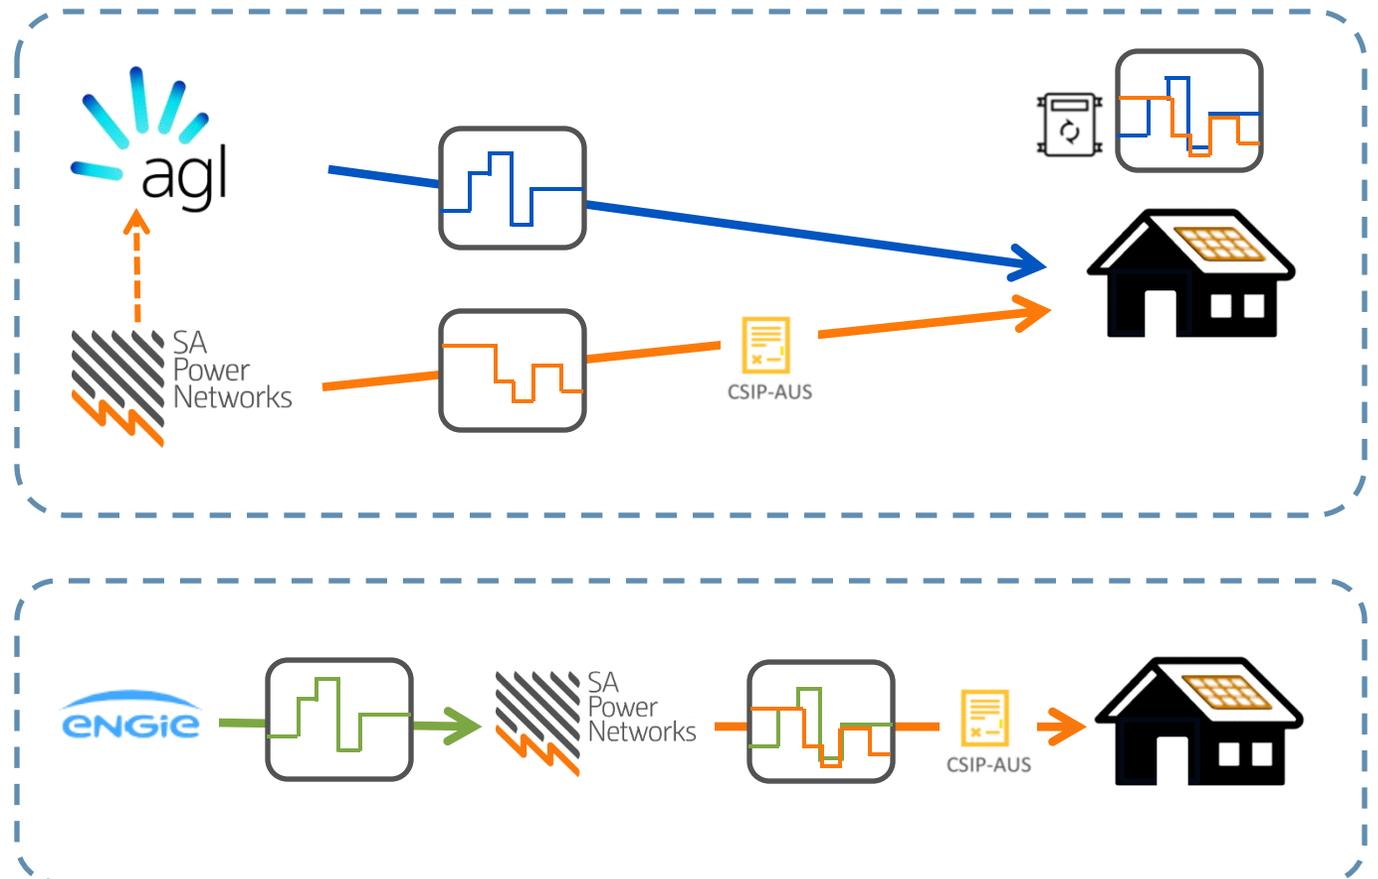

Market Active Solar

Test solar management market offers from retailers combined with SAPNs flexible exports offering.

The trial aims to:

- Test technical approaches
- Test customer incentive response
- Test customer understanding and acceptance of products developed by retailers

100 Customers for 12 months.

Opportunity for networks and retailers to collaborate, share information and develop best outcomes for customers

Next session will explore some more details of the projects included here.
